### Parts of an Eye

The pupil lets light into the eye. This helps people and animals to see. When there's lots of light, the pupil is little. When there's no light, the pupil is big.

People have tears to clean their eyes. People cry tears when they are sad, too!

→ Go to page 21 for activities.

# Eyes at the Front

People and many animals have two eyes at the front of their head. This helps them to see things far away.
